

// Hi, I'm Azhar Uddin |

I build WordPress plugins that power real stores.

Software Engineer with 4+ years in PHP, Laravel, WordPress & WooCommerce. I've shipped custom plugins, CRM integrations, and conversion-tracking setups for stores that sell every day — and I contribute to plugins used by millions, like MetForm and ShopEngine.

What I work with

02 — EXPERIENCE

Where I've worked

Roxnor
Software Engineer
May 2023 — Present · 3+ years

- Contribute to widely-used WordPress plugins — MetForm, ShopEngine, WP Social, GutenKit, PopupKit, EmailKit, Met Sales Countdown, ElementsKit — with millions of combined installs.
- MetForm: built General Form & Global Analytics (user-data tracking), Dropbox & Google Drive integrations, and form scheduling; shipped built-in templates (job application, calculation, quiz forms) and integrated MailPoet, AWeber & Google Sheets.
- ShopEngine: built the Fake Order Block module, wishlist template widget with built-in templates, and payment-method template & widget; improved WooCommerce functionality with many bug fixes.
- PopupKit: architected the backend structure and core Gutenberg block support.
- WP Social: connected Facebook, LinkedIn, Google & Instagram APIs for social login and follower counters.
- YoSuite (Roxnor's new SaaS HRM & Payroll): built the Inventory Management module (asset & other requests) and People module features — employee effective dates with job scheduling — on a modular Laravel architecture similar to FilamentPHP.
- Integrated third-party APIs across products: Zoho, Mailchimp, Google reCAPTCHA, Facebook, Pinterest, LinkedIn.

Freelance
WordPress Plugin Developer
Ongoing

- Author of my own approved WordPress.org plugin 'Azhar FAQ for Elementor'.
- Built custom WooCommerce plugins for client stores — Fake Order Notification (with user blocking + order data sent to Google Sheets), Cart Converter (cart recovery), Back Order, and Quick Buy Now.
- Connected WooCommerce to Ecom King CRM (servicekey.com.bd) via a custom WordPress plugin — syncing full order and customer data over REST APIs.
- Set up PixelYourSite for SEO and conversion tracking, sending WooCommerce event data to marketing platforms.
- Built dccbazar.com and ansclothes.com with Elementor; plugin developer for the DCC Bazar full-stack storefront on Vercel.

BugBuildLabs
Junior Backend Developer
Nov 2022 — Mar 2023

- Developed backend features using Laravel with modular architecture.
- Worked on CodeCanyon projects: SPA, charity, and portfolio systems.
- Built REST APIs and optimized database queries.

03 — PLUGINS

Plugins I've built & shipped

From my own approved WordPress.org plugin to custom WooCommerce extensions running on live stores.

WP.ORG — MY OWN APPROVED PLUGIN

Azhar FAQ for Elementor
My own approved WordPress.org plugin — a reusable, accessible FAQ widget for Elementor with clean markup and easy styling.

WOOCOMMERCE — FREELANCE

Fake Order Notification
Detects and blocks fake orders, blocks abusive users, and sends order data to Google Sheets via a custom integration.

WOOCOMMERCE — FREELANCE

Cart Converter
Cart recovery plugin that tracks abandoned carts and helps stores win back lost sales.

WOOCOMMERCE — FREELANCE

Back Order
Lets stores keep selling out-of-stock products with clear back-order flows and stock handling.

WOOCOMMERCE — FREELANCE

Quick Buy Now
One-click buy-now button that skips the cart and takes shoppers straight to checkout.

REST API — SYNC

WC Product Sync → Vercel App
Syncs WooCommerce products to the DCC Bazar full-stack storefront on Vercel — keeping the modern JavaScript frontend in step with the store catalog.

CRM — REST API

WooCommerce ⇄ Ecom King CRM
Custom plugin syncing full order and customer data between WooCommerce and Ecom King CRM (servicekey.com.bd) over REST APIs — powering SEO and sales tracking.

CORE CONTRIBUTOR @ ROXNOR · 3+ YEARS Plugins with millions of combined installs that I help build and maintain:

MetForm

ShopEngine

ElementsKit

WP Social

GutenKit

PopupKit

EmailKit

Met Sales Countdown
